

REFLECTIONS
COPENHAGEN

Colourfully Clear, Superbly Shining

With a desire to fuse dynamic reflections and the artistic genre, Danish homeware label Reflections Copenhagen creates collections of handmade crystal decor and tableware in a charming Art Deco style and often inspired by bold colors and graphical forms.

Reflections Copenhagen Exists in a Space in Between Interior and Art

Two creative minds, determination and a great idea laid the cornerstone for Reflections Copenhagen. Founded in 2015, Reflections Copenhagen is a collaboration between the Danish designers, Julie Hugau and Andrea Larsson. Emerging out of a mutual feeling that there was a need for something different, the two designers began looking for unconventional ways to combine decor and art.

Go Against the Mainstream

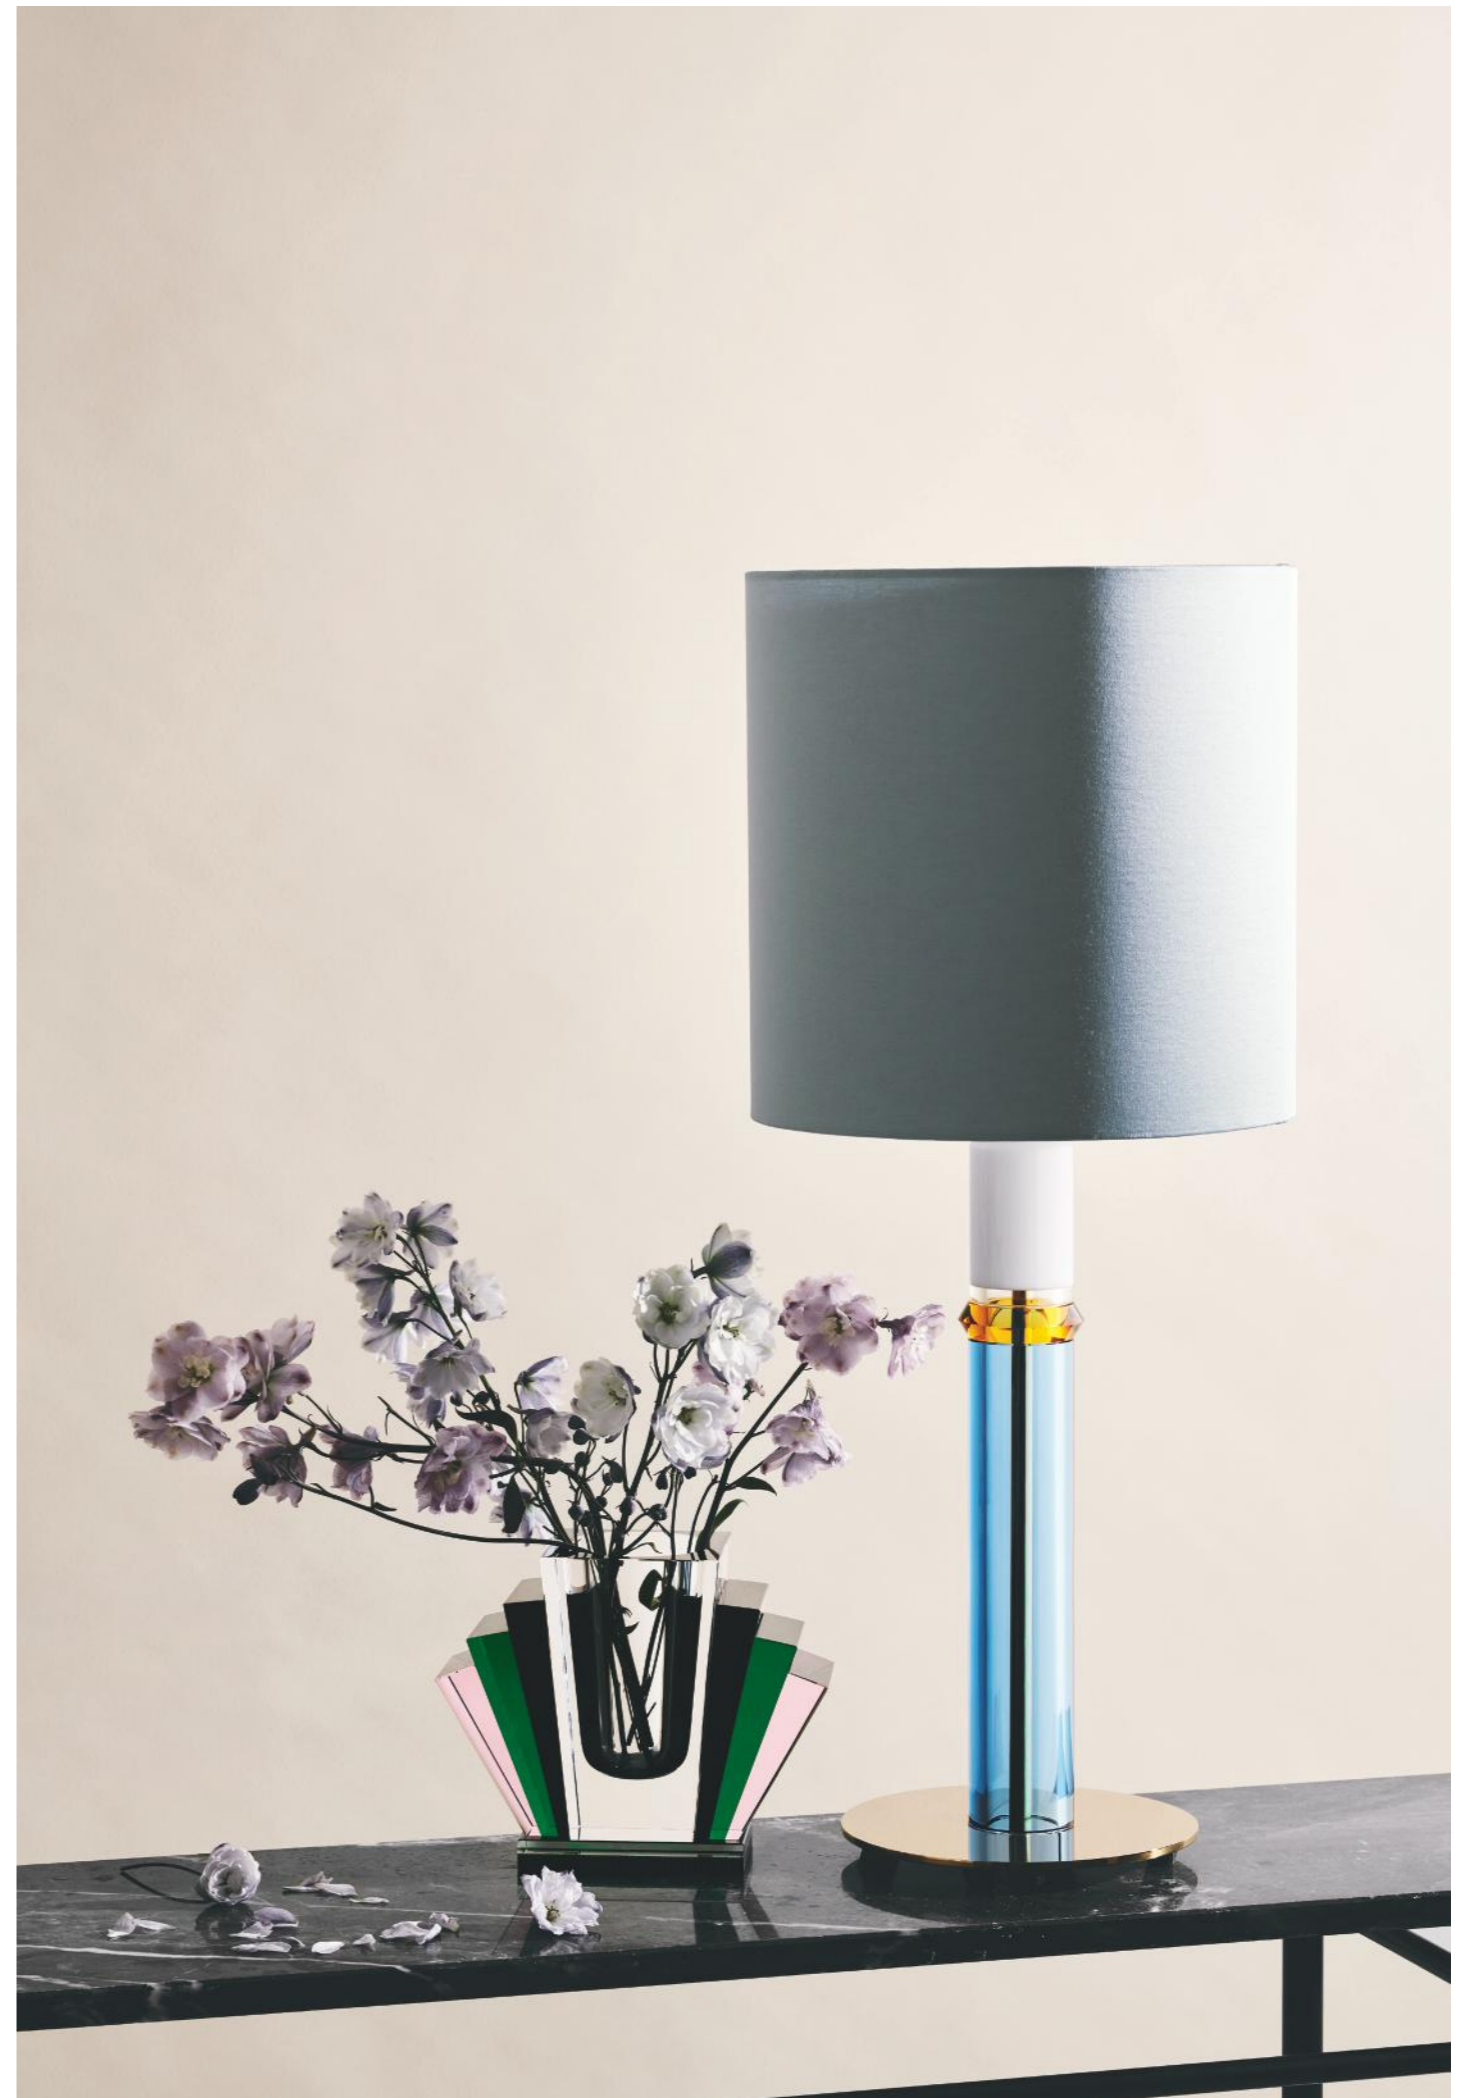

Reflections Copenhagen's designs are created to challenge the traditional styles, colors and shapes by adding new dimensions and possibilities to the decor. The brand challenges mass perception and production with a sustainable mindset by contributing high-quality designs that last for generations. All products are individually produced by hand using unique artisan techniques.

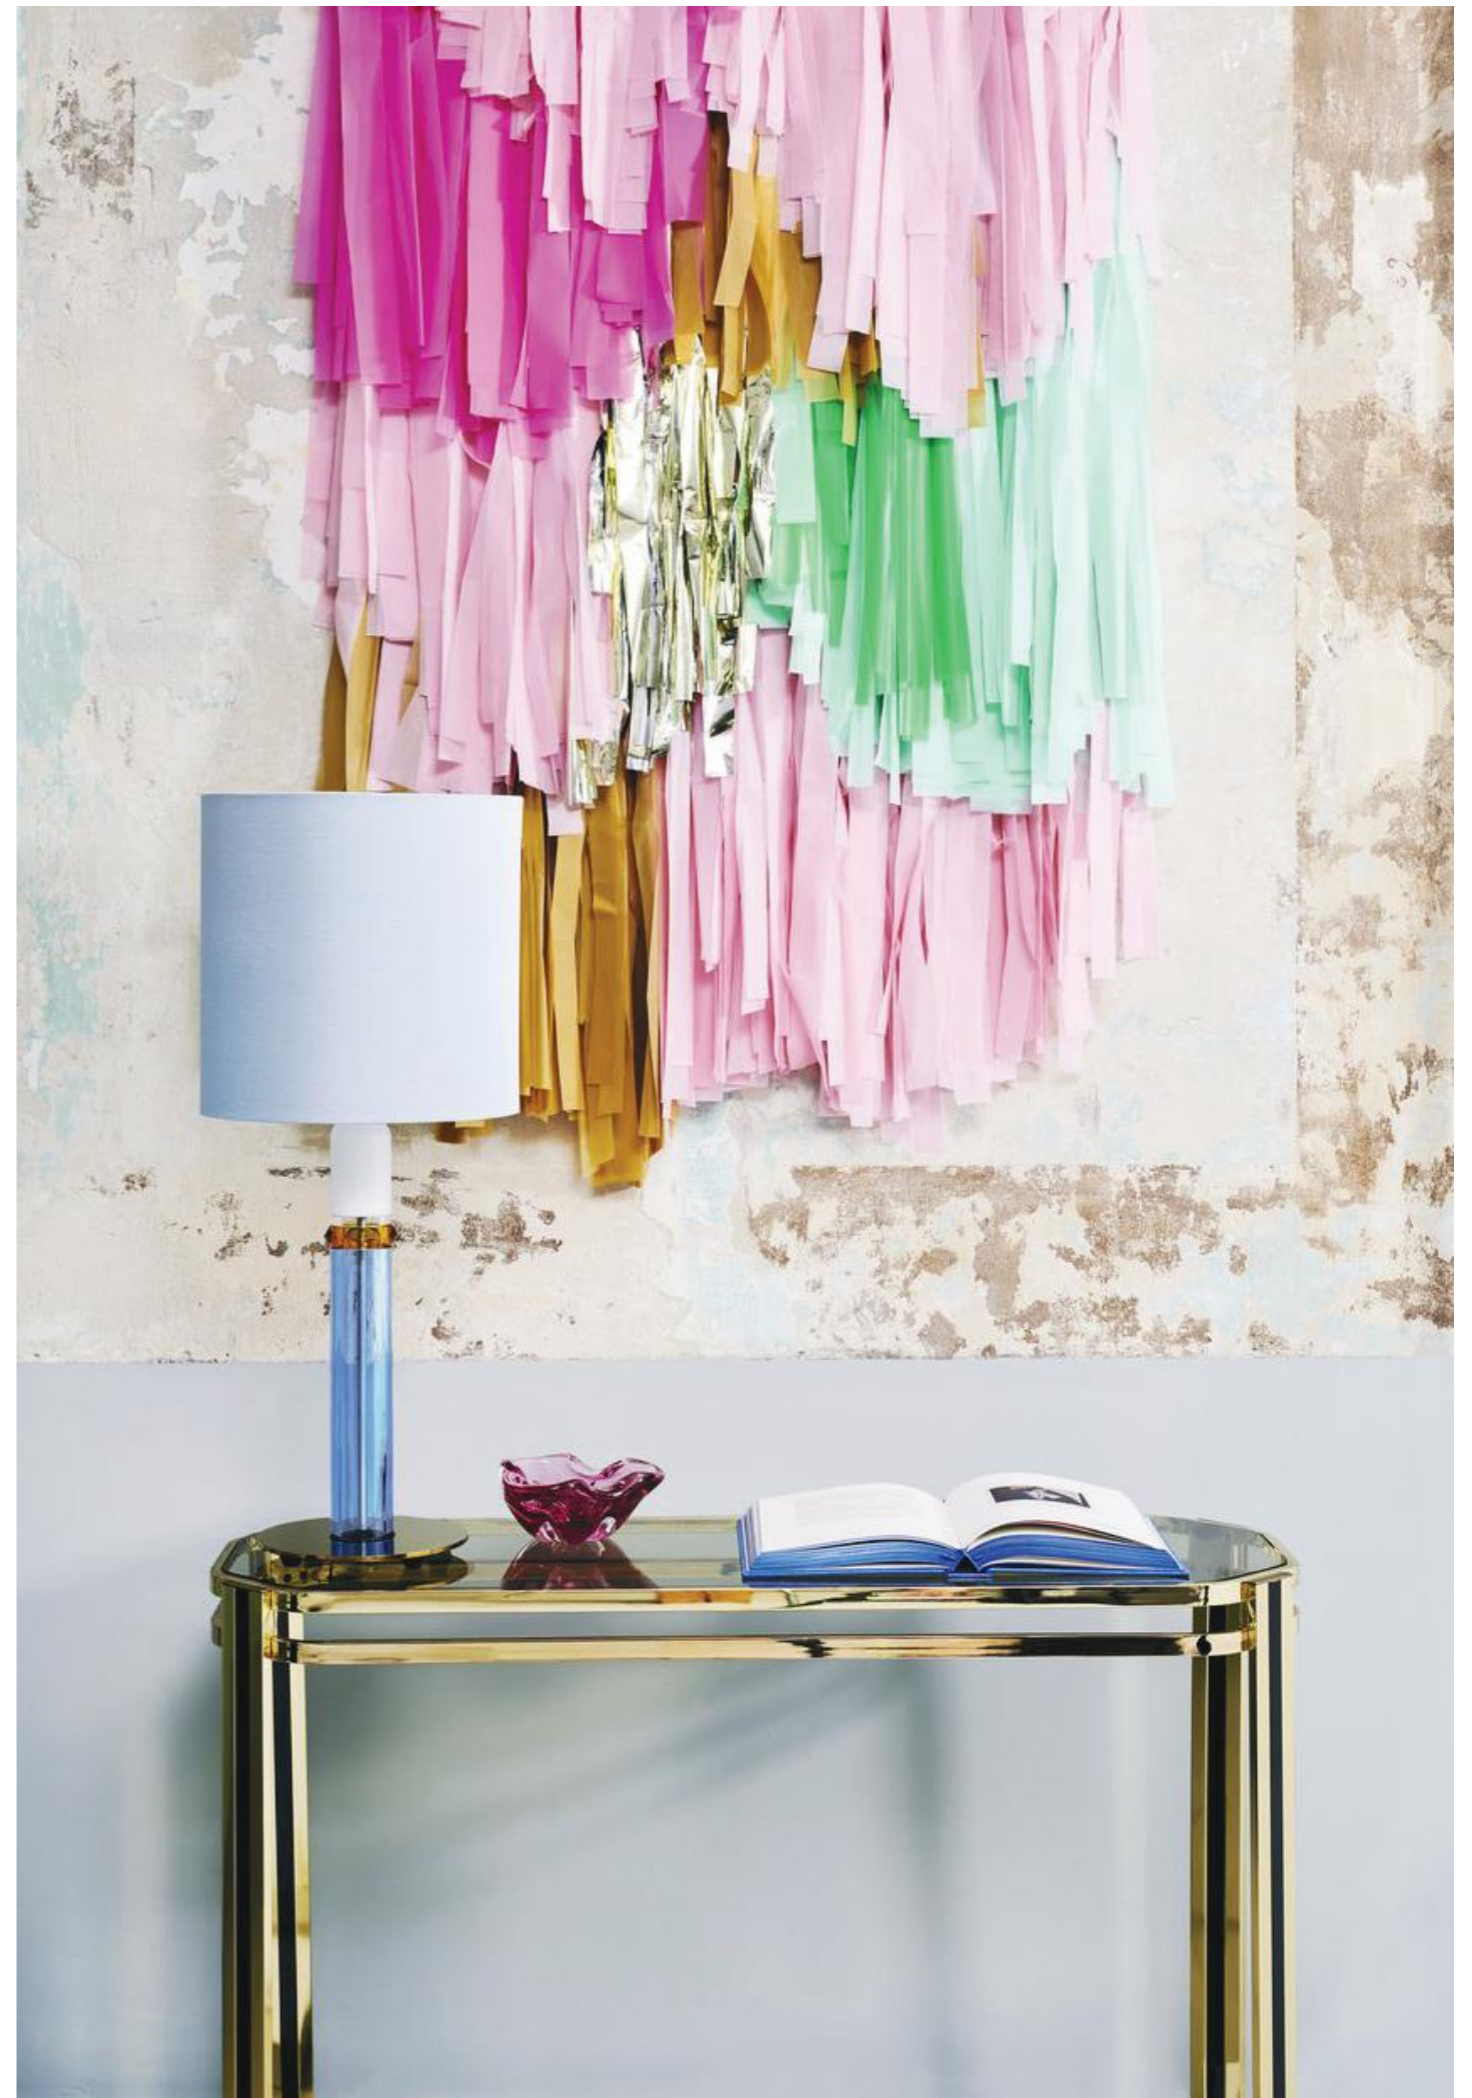

Establish Beauty that Touches People

Through an autonomous experimenting design approach and use of strong materials, Reflections Copenhagen pioneers the creative field to create the highest aesthetic designs, which unite exquisite materials and geometric shapes to form functional art objects.
